Dual Stage Boost Controller V2 Turbosmart TS-0105-1102

Cena brutto	1 365,00 zł
Cena netto	1 109,76 zł
Numer katalogowy	TS-0105-1102

Opis produktu

The new and updated dual stage boost controller, now featuring a billet aluminium housing and bullet valve technology for ultra fast boost response with two adjustable boost levels. Toggle between high and low boost on the fly. Ideal replacement for factory boost controllers. Both high and low boost settings are fully adjustable. All Turbosmart Gated Boost Controllers feature our exclusive Gate feature which minimizes wastegate creep and can improve turboresponse by up to 800 rpm earlier in the rev range - this means that you can increase the performance and response from your engine without even raising the maximum boost level. Stable increases in boost over wastegate spring pressure of 200%+ for internal wastegate and 100% for external wastegates are common practice using our manual boost controllers. Manufactured from high-grade billet aluminium and are renowned for their easy installation, robust design, stability and our detent adjustment system allows for accurate and simple tuning of boost pressure. The Turbosmart Gated Boost Control Valve range is ideal for mildly modified turbocharged engines and perfect for increasing boost levels on factory turbo cars and turbocharged engines. Supplied With: All fitting hardware and a Rocket Launcher Switch.
