## Ecumaster Moduł GPS to CAN v2

Cena brutto	<b>1 515,00 zł</b>
Cena netto	<b>1 231,71 zł</b>
Dostępność	<b>Na zamówienie</b>
Numer katalogowy	<b>331513070</b>
Kod producenta	<b>ECU-3S2GPS0001</b>

### Opis produktu

GPS TO CAN V2 Ecumaster GPS module assures high-accuracy position tracking with a 25 Hz update rate. The module can use four navigation systems at the same time: GPS, GLONASS, Galileo, and BeiDou. An external, active antenna with a magnetic base is included with the module. Thanks to a built-in 3-axis accelerometer and gyroscope, the device can deliver information about speed, position, heading, altitude, accelerations, and angular velocities. All GPS data is transmitted via CAN bus. The GPS module is intended to work with the ADU display/logger and allows real-time lap timing, predictive timing, as well as data analysis after the session with a track map visualization.

1x Ecumaster GPS to CAN V2  
1x Zestaw montażowy z tłumikami drgań  
1x Wtyczka szara 4pin z terminalami  
1x Antena GPS A.166  
1x Opis wyprowadzeń
