### EFI Single Nozzle System with 5Lb Bottle for Ford (35-50-75-100-150 Hp)

This system includes a single Shark nozzle, nozzle mounting bung, Lightning series solenoids, 24" 3AN stainless braided solenoid to nozzle lines, 15 Foot 4AN stainless braided nitrous feed line, 18" 4AN fuel feed line, nickel plated fittings, wide open throttle switch, master arming switch, 40 Amp relay, relay harness, Ford fuel rail fitting, stainless bottle brackets and a 5 lb nitrous bottle with the Lightning bottle valve. This system includes jetting for 35, 50, 75, 100 and 150HP. The system can be easily upgraded later to support up to 250HP.

This system includes the latest technology and the best components available. NX Lightning solenoids feature an improved flow path that eliminates sharp turns and expansion areas in the nitrous flow path. This keeps the nitrous in dense liquid form which makes more power on less nitrous. Lightning nitrous solenoids feature an integrated purge port which allows you to connect a purge valve directly to the body of the nitrous solenoid for clean looks and less plumbing. Lightning Series solenoids feature CNC aluminum bodies topped with Carbon Fiber cans for the ultimate in weight savings.

*If you have an aftermarket engine management system that is capable of adding nitrous enrichment fuel and want this system DRY (no fuel components), please contact us*
