The Forge Motorsport Exhaust consists of a centre pipe section, back box section and a removable tailpipe fitting. All parts are a direct replacement for the OEM exhaust system and no additional modifications are required in order to install.

In testing, we have found this exhaust to offer the perfect balance of tone and volume. It offers a deep yet subtle burble on idle, which increases in volume during acceleration. The exhaust note is not "raspy" and, when cruising, it is not "boomy"; in fact, at motorway speeds, the engine/transmission/wind noise is louder than this exhaust
