Opis produktu

One pair of Forge Motorsport strut top covers, CNC machined from aluminium billet.

These will not only improve the appearance of the strut tops but will also eliminate any water ingress from the top which is a common problem on the many vehicles, this issue can cause corrosion which can further develop to strut failure and other problems along the strut tops.

Development prototypes were first created through 3D CAD and then prototyped on our inhouse 3D-Printer to allow for the best fit to stop corrosion of the strut top and provide a tight fit to prevent any water ingress occurring.

Available in 3 colours to suit whatever your vehicle or build may be, our strut top covers are aesthetically pleasing whilst also providing the key role of protecting the exposed strut tops as they come as standard.

No fasteners required as the machined internal thread allows these covers to screw directly on to the strut top stud.

Available in anodised black, red, or in a polished finish. Please choose from the dropdown above.
