Opis produktu

This replacement hose and alloy couplers is an essential upgrade for all owners with tuned cars running higher boost pressures. The hose is made from Fluoro silicone (available in ocre colour only) with Nomex re-inforced lamination. This combination can withstand the high temperatures associated with being fitted so close to the turbocharger and withstand the oil that may accumulate within the hose, which would normally lead to degradation if ordinary silicone was used.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*

PLEASE NOTE: THE ORIGINAL O-RINGS/SEALS MUST BE RETAINED FOR USE ON THE FORGE HOSES
