### Opis produktu

This plastic sheet stencil can be used to spray or paint on the Forge logo onto an intercooler and more!

For the best result:

- Use masking tape to secure the stencil in a fixed position, double check the location and cover any other components you do not wish to get paint on (fenders, bumpers, reservoirs etc).
- Spray the paint about 300mm away from the stencil. For the best finish, apply two or three thin layers - This will give an even paint coverage and avoid runs.
- Wait for the paint to dry between layers.
- Wait for paint to dry completely and remove stencil.
