Opis produktu

FMKT023 Honda Civic Type R boost hoses 2015-on

This kit comprises of four silicone hoses which will withstand greater temperatures and pressures compared with the OEM hoses plus they look fantastic. They replace the intercooler inlet and outlet, the turbo inlet and the throttle body inlet. These are all of the hoses in the boost circuit, with everything else being hard pipes. The hoses are available in different colours which can be specified above at point of order.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
