Opis produktu

FMKT022 – Ford Mustang 2.3 EcoBoost boost hoses

This Forge Motorsport 4 piece boost hose kit for the Ford Mustang 2.3 EcoBoost replaces all of the OEM hoses between the turbo and the throttle body with silicon, which are better able to handle high pressures and temperatures than the original rubber. They are available in red, blue and black so that you can make your engine bay stand out, or look original, whichever you want.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
