Cena brutto **5 514,71 zł**

Cena netto **4 483,50 zł**

Numer katalogowy **WF900N**

Opis produktu

The Wisefab Narrow Angle Kit for the BMW E9X and E8X models offers a perfect balance between street usability and drift performance. This kit features a more compact track width, making it ideal for builds where keeping the car streetable or avoiding wide overfenders is a priority. Despite its narrower design, the kit delivers serious angle — up to 55 degrees of steering lock — along with Wisefab's signature geometry improvements for precise handling and maximum control. It's the go-to choice for drivers who want high-performance steering without going full competition spec. NB! This kit does not fit with M3 knuckles. Kit includes: Knuckle add-ons with hardware. Lightweight one-piece lower control arms. Assembled tie rods. Installation guide Useful information: This kit does not fit with M3 knuckles. This kit is recommended to be used with the coilovers to have enough clearance. Depending on your wheel spec some mild fender-flares might be needed with this kit. Perfect fit under OE E9X fender with 18x8" ET35 wheel (225/40 R18) Recommended setup: Camber: -5.5 degrees Caster: 9 degrees Toe: 2mm toe-out
