### Opis produktu

**The Nuke Performance Fuel Filler Hose Kit is the perfect solution for all of your fuel-filling needs. Its anti-static corrugated design allows for maximum flexibility.**

Thanks to its lightweight construction, an 80% weight savings in comparison to commonly used aftermarket 50mm (2") fill hoses is achieved, which means it won't add unnecessary weight to your vehicle, making it ideal for motorsports applications.

Extremely flexible thanks to its corrugated design  
Safe for all types of fuel, including alcoholic fuels  
Very lightweight, with up to 80% weight savings  
Anti-static nylon hose and Viton bushings  
50mm (2") internal diameter  
Fits straight onto the CFC Unit and Remote filler cap

The Nuke Performance fuel filler hose is also highly durable, able to handle all types of fuels including E85 and other alcoholic fuels, even during long time periods. It is perfect for use with aftermarket fuel cells such as ATL, Pyrotec, AluCell, Fuel Safe and others, and can easily connect to a remote fill neck or OEM filler cap. Whether you're using it in motorsports or just need a reliable and flexible fuel transfer hose for your vehicle, this hose has you covered.

**Experience the ultimate fuel-filling convenience with our flexible, and lightweight fuel-filling hose kit.**

The Nuke Performance Fuel Filler Hose Kit, 90cm (3ft) is designed with convenience in mind. Its corrugated design allows it to bend and move easily, making it extremely easy to work with. Our fuel hose is easy to work with and significantly lighter than other options, weighing in at almost 80% less than other commonly used hoses on the market. Whether you are a professional mechanic or a DIY enthusiast, the Nuke Performance fuel filler hose is perfect for you. Effortlessly route your fuel filler hose for motorsports setup with the combination of the Nuke Performance CFC Unit, Remote Quick Lock Filler Cap, and this fuel filler hose kit.

**50mm (2") internal diameter, the perfect remote fuel filler hose for all the available CFC Units from Nuke Performance.**

The Nuke Performance CFC Unit is equipped with a low-profile filler cap, easy to use for some but for most a remote filler solution is requested. The Fuel Filler Hose Kit, 90cm (3ft) is developed to be used with the CFC Unit and fits straight onto the additional Remote Filler Neck.

Made for the Nuke Performance CFC Units / Fuel cells  
50mm (2") inner diameter for universal installations

This fuel hose is designed with the same functionality in mind as all other Nuke Performance parts, safe for all types of fuels, such as gasoline and ethanol, and is the lightest solution on the market which lets you get a functional installation at the same time as saving crucial weight.

**Safe for all types of fuels, including alcoholic fuels such as ethanol. Will stay durable and flexible even with long-term use.**

---

The 50mm (2") fuel filler hose kit, 90cm (3 feet) from Nuke Performance is safe for all types of fuels, including alcoholic fuels such as ethanol. It remains flexible and durable even with long-term use, including when used with alcoholic fuels which has a negative impact on other commonly used hoses on the market.

Anti-static nylon, for a safe and secure fuel-filling operation  
Safe for all types of fuel, including alcoholic fuels

The Nuke Performance fuel filler hose is made from the same anti-static nylon as our corrugated hoses used in our in-tank fuel pump mounting kits, the anti-static nylon material helps dissipate static electricity as the fuel flows through the hose.

**Delivered with Viton bushings and stainless steel hose clamps for a clean, safe, and easy installation.**

The hose is delivered as a kit that includes bushings and steel hose clamps, and thanks to its corrugated design it is the lightest solution available on the market. It comes with Viton (safe for alcoholic fuels) bushings and stainless steel hose clamps for easy installation and can be cut to length if needed (read the product manual). To attach the hose to the Nuke Performance CFC Units, you need to use the additional Remote filler neck, and for your remote filler cap need, it fits straight onto the Nuke Performance Remote Quick Lock Filler Cap.

**Remote quick lock filler cap Part # :** [150-30-201](#)

**Combine with the Nuke Performance Remote quick lock filler cap for a trouble-free and easy-to-reach fuel fill installation.**

Simplify your fuel cell fuel-filling process with the Nuke Performance Remote Quick Lock Filler Cap ([available here](#)), the perfect combination with the flexible and lightweight fuel filler hose. The Nuke Performance filler cap features a lightweight design and a quick lock mechanism. With just a 90-degree turn, you can lock and unlock the cap with ease.
