Fuel Pressure Regulator Conversion KIT RA-series Black Radium Engineering

Cena brutto	379,00 zł
Cena netto	308,13 zł
Dostępność	Na zamówienie
Numer katalogowy	331467097
Kod producenta	USA-RAD-20-1101-00

Opis produktu

OVERVIEWThis kit permits all previous Radium Engineering adjustable fuel pressure regulators to be converted to an RA-Series FPR. This will add all of the newest features as well as performance enhancements to older regulators. **FUEL PRESSURE ADJUSTMENT**RA-series regulators feature the first tool-less pressure adjustment. A jam nut and set screw are no longer required. With a simple turn of the knob, pressure will be increased or decreased.To aid in adjusting pressure, there are incremental detents that provide haptic feedback to the user. Every detent permits 1psi (+/-0.5psi) of adjustment depending on current fuel pressure. **FUEL PRESSURE STABILITY**With years of track and bench testing data, the RA-series regulators have been refined to optimize pressure management. A newly designed single stainless steel return orifice generates laminar flow that enhances stability control.**Minimum Pressure: 18.5psi (1.3bar)Maximum Pressure: *N/A***This is rhetorical. The maximum pressure is dependent on the relief valve inside the pump or the maximum current the fuel pump controller allows. **FUEL COMPATIBILITY**This RA-series conversion kit is suitable with all gasoline types including unleaded, leaded, oxygenated, and pre-mixes. Furthermore, they are compatible with alcohol blends of fuel including methanol, ethanol, and E85. **INCLUDED-**Upper Rotating Assembly-5mm Barbed Vacuum Fitting-Vacuum Plug Fitting (Returnless)-1/4" Push-To-Connect Vacuum Fitting-3AN Male Vacuum Fitting-Anodized Half Moon Retainers (x2)-Stainless Steel Return Orifice-Stainless Button Head Screws (x5)-Stainless Steel Spring-Fluorosilicone Diaphragm Instruction PDF
