**E36 BMW 3-Series (OBDII Only)**

For those looking to increase the power output of their BMW, this plug and play (bolt-in) fuel pump replacement solution uses the most popular high performance fuel pumps on the market. No permanent modifications to the fuel system are required for installation of this product.

This kit features a 6061-T6 CNC billet aluminum sleeve that slides over the corresponding 39mm aftermarket pump to mimic the larger diameter of the BMW fuel pump. The machined rib snaps into the fuel pump hanger and properly locates the filter sock.
