The physical size and shape of the factory injectors are not found in the aftermarket with a high flowing option. These Radium Engineering 2GR-FSE fuel rails allow the use of very common high flowing Bosch EV14 fuel injectors.

#### FUEL INJECTORS

The OEM fuel injectors are NOT compatible with these fuel rails.

The machined ports are compatible with 14mm upper injector O-rings.

Because of the tight intake plenum clearance, the injectors must be extremely short.
