Cena netto	1 625,20 zł
Dostępność	Na zamówienie
Numer katalogowy	331496342
Kod producenta	USA-RAD-20-0288

Opis produktu

This comprehensive installation kit includes everything needed to install a Radium fuel surge tank with a single 39mm fuel pump in a Porsche (996) 911 Turbo. The Porsche 996 Turbo install kit locates the FST in a collision-safe area of the trunk, centered in front of the fuel tank allowing the majority of the trunk to be useable. The anodized aluminum bracket solidly mounts to the OEM fuel pump cover studs and an aluminum replacement fuel pump cover is included. The OEM fuel pump hanger utilizes a sensitive dual venturi pump system that cannot be easily altered. This FST install kit includes a specifically designed FST orifice that keeps the necessary pressure in the OEM venturi system. To adapt the PTFE hoses to the OEM Porsche lines, Radium has designed special low profile SAE quick disconnect fittings that are provided in the kit. Included: -Preassembled 3/8" (-6AN) PTFE Hoses -Aluminum Mounting Bracket-Aluminum Pump Hanger Cover-AN and OEM Style Adapter Fittings-Stainless Steel Hardware -Wiring Components with Relay and Fuse-Solderless Heat Shrink Connectors Instruction PDF
