Opis produktu

GReddy 0030 FA20/FA24 Oil 100% synthetic engine oil Grade 0W30 Specifically formulated for Toyota GT86/GR86 & Subaru BRZ Improved response and elimination of power losses Street and track use Packaging : 5 liter can Greddy part number : 17501266 Greddy 0030 Engine Oil for FA20 & FA24 Specifications Greddy 0030 Specialized Oil for FA20 and FA24 is a high-performance engine lubricant specifically designed for the 2.0L and 2.4L boxer engines of the Toyota GT86, GR86 and Subaru BRZ used on street or track. Produced in Japan, this 100% synthetic 0W30 oil has been developed with the concept of achieving sharp response and suppressing power loss. It is a blend of VHVI (very high viscosity index) lubricants with high stability at all temperatures and PAO (polyalphaolefins) with excellent cold properties. What's more, Greddy 0030 oil prevents metal abrasion caused by dry starts, and effectively lubricates and protects the engine interior even in high-temperature, high-load zones, such as when driving on a racetrack. Finally, it contains an FM Booster that reduces the coefficient of friction by forming a film on the surface of the metal, for improved response, delayed wear and controlled oil temperature.
