GReddy Airinx-GT Air Filter Specifications
This GReddy Airinx-GT high performance filter goes in place of the original air filter of your vehicle. Made with special fibers, it provides a higher intake flow compared to the standard filter while its laminated metal structure guarantees excellent rigidity and durability. The rubber housing is fully sealed and prevents even the smallest dust from entering the intake. This filter is very high quality while remaining particularly affordable and fits directly in the original air box. We invite you to check the size of the filter directly on your vehicle before purchasing.
Compatibility Part no. TY-16GT Toyota GT86 : all models before facelift (2012-2016) Toyota GT86 : after facelift (2017+), automatic transmission only Subaru BRZ : models A to D + E automatic transmission only Dimensions : 290mm x 150mm Part no. TY-23GT Toyota GT86 : after facelift (2017+), manual transmission Subaru BRZ : model E manual transmission Dimensions : 265mm x 150mm
