Filter external diameter : 145 mm
Output for 70 mm tubes
Dry filter, no maintenance required
Easy and quick to install
Official GReddy product made in Japan
GReddy part n° : 12500602
GReddy "Airinx" Universal Air Filter Specifications
Made in Japan, the "Airinx" universal filter is identical to those included in GReddy turbo kits, or GReddy direct intakes. Over time your OEM air filter can become dirty, greasy and worn out, reducing your engine's performance. To improve filtration and your engine's suction, GReddy propose a high quality filter, available in black they are both efficient and discreet. Consisting of multiple layers of high performance urethane filter elements, this filter is ideal for maximizing air flow while improving filtration fineness.
