Opis produktu

GReddy Aluminium Pulley Kit
To suit Toyota GT86 ZN6
Engine code : 4U-GSE
Duralumin (A2017) with anodized blue finish
Improved engine response
Minimised power losses
Lightweight and sturdy
Compatible with OE belts
GReddy part number : 13512111
Fast shipping !
GReddy Aluminium Pulley Kit for Toyota GT86 ZN6 Specifications
This GReddy pulley kit has been specially developed for the 4U-GSE of the Toyota GT86 ZN6. Thanks to their design in duralumin (an alloy made from aluminium, copper, magnesium and manganese) with a blue anodised finish, these pulleys are as light as they are strong, significantly reducing the inertia momentum of the engine's axis of rotation. Power losses are minimised and throttle response is improved. These pulleys are perfectly compatible with original belts.
Kit contents :
Water pump pulley
Alternator pulley
Tensioner pulley
Idler pulley no.1 x2
Idler pulley no.2
