### Opis produktu

GReddy Circuit Spec Front Pipes  
For Nissan GT-R R35  
Engine code : VR38DETT  
Removes the primary catalytic converters  
SUS304 stainless steel  
Tube diameter : 76.3 mm  
Bolt-on fitment  
Made in Japan  
GReddy part number : 10520601  
GReddy Circuit Spec Front Pipes Specifications  
Known worldwide for its exhausts, the Japanese manufacturer GReddy presents the Circuit Spec front pipes for Nissan GT-R R35 with VR38DETT engine. These SUS304 stainless steel pipes remove the two standard primary catalysts and improve gas flow, engine response and overall performance. As they remove important parts of the car's emission control system, their use is prohibited on open roads.  
Warning: After installing these front pipes, the engine warning light (catalyst fault) may turn on. In this case, GReddy recommends to have the ECU remapped by a professional.  
Characteristics :  
Section : front pipe  
Material : stainless steel  
Type : 2 pieces, diam. 76.3 mm
