For Nissan Skyline ECR33 with RB25DET engine
Maximises air supply to the engine
Ideal for use with aftermarket turbo and intercooler
3.6 L collector tank capacity
90 mm throttle body required (not included)
Made in Japan
GReddy part no. : 13522316
GReddy Surge Tank for Nissan ECR33 Specifications
Manufactured to make the most of the RB25DET engine in the Nissan Skyline ECR33, this high-volume, high-flow GReddy cast aluminium plenum is ideal for use with aftermarket turbochargers and intercoolers. Its cross-flow layout allows airflow to enter each cylinder undisturbed and evenly for improved engine performance. It retains the use of the genuine side-feed main injectors. It is only compatible with a large-diameter 90 mm throttle body (from Infiniti Q45) and requires certain genuine Nissan parts.
Key Features
To fit RB25DET engine (ECR33 only)
Tank capacity : approximately 3.6 L (1.7 times the OE ratio)
Parts required (not supplied): Q45 throttle body, wiring extension, S14 throttle cable, throttle chamber gasket, throttle cable bracket only for models from January 1995.
Please note : as the mounting position is different from stock, some piping modifications may be required.
