GReddy Intake Plenum for Toyota 2JZ-GTE (Surge Tank)

Cena brutto	7 010,95 zł
Cena netto	5 699,96 zł
Numer katalogowy	13512303

Opis produktu

GReddy Surge Tank / Intake Plenum
For Toyota 2JZ-GTE
Maximises air supply to the engine
Compatible with high boost pressures
4 L collector tank capacity
90 mm throttle body
Fuel rail for 14 mm top feed injectors
Perfect for swaps and custom setups
Made in Japan
GReddy part no. : 13512303
GReddy Surge Tank Pro Kit for Toyota 2JZ-GTE Specifications
Designed specifically for custom builds powered by the Toyota 2JZ-GTE engine, this GReddy Pro kit offers the versatility to perfectly match the throttle body inlet angle and the air/vacuum ports of your engine bay. It features a 4-litre tank with a large 90mm throttle body, a top feed fuel rail and the necessary weld-on flanges. Precision-welded and machined, the highly rigid plenum uses 3mm-thick aluminium to withstand high boost pressures and features six individual, internal velocity stacks. Carefully designed primary runners also help increase airflow to maximise engine intake efficiency.
Key Features
4-litre capacity collector tank (normal ratio 200%)
Tuned internal velocity stacks on each runner
Primary runner length 130mm, OD 14.0mm, ID 13.0mm
Specific O-rings for maximum manifold/head sealing
Throttle-body hose diameter 100mm, internal butterfly diameter 90mm with low-profile throttle shaft
Fuel rail for 14mm top feed injectors (e.g. compatible with Nissan R35 VR38DETT factory injectors)
Compatible with OEM factory ICV (Idler Control Valve) and TPS (Throttle Position Sensor)
Please note : Welding required to attach throttle body flange, throttle cable mount and air port flanges.
Kit Contents
Surge tank
Throttle body
Throttle flange
Fuel delivery tube and mounts
