For Nissan 300ZX Z32 (89-00)  
Engine code : VG30DETT  
Improve cooling  
Enhance performance  
Aluminium intake tube included  
Made in Japan  
GReddy part no. : 12020226  
GReddy Intercooler Kit for Nissan 300ZX Z32 Specifications  
Developed by GReddy, this kit for Nissan 300ZX Z32 makes it possible to advantageously replace the original dual intercoolers in favor of models with higher efficiency. Specifically designed for this vehicle, they ensure exemplary reliability and increased performance. These two intercoolers improve intake air cooling thanks to the generous size of their internal fins, which are 2.8 times larger than the original ones, and their optimised construction. This kit that can be installed with the OEM pipe layout. However, the original intercooler air duct cannot be retained during fitting, nor can the bumper side brackets. The canister tube must also be bent and the original hose cut. The stock air filter duct cannot be fitted either. This kit is compatible with the GReddy Airinx NS-M034 Z32 intake kit (part no. 12520834) and the D04H 15G 8.5cm<sup>2</sup> turbo kit (11520098). Make the most of the twin-turbocharged engine potential of your Nissan 300ZX Z32 with this very high quality kit, the result of many hours of development and rigorous testing, made in Japan by GReddy!  
Characteristics :  
Core size : 266 mm (height) x 260 mm (length) x 66 mm (width)  
Piping diameter : 50 mm  
Kit contents :
