Opis produktu

GReddy GXPA16 Intercooler For Toyota GR Yaris GXPA16 Engine code : G16E-GTS Improves cooling Enhances performance Aluminium air tube included Made in Japan GReddy part no. : 12010215 GReddy Intercooler Kit for Toyota GR Yaris GXPA16 Specifications Developed by GReddy, this kit for Toyota GR Yaris GXPA16 makes it possible to advantageously replace the original intercooler in favor of a model with higher efficiency. Specifically designed for this vehicle, it ensures exemplary reliability and increased performance. This intercooler improves intake air cooling thanks to the generous size of its internal fins, which are 1.2 times larger than the original ones, and its optimised construction. This version of the kit features an aluminium tube that replaces the OEM intake duct (which connects to the throttle body) to eliminate any swelling or deformation and thus stabilise the air supply to the engine. Make the most of the turbocharged engine potential of your Toyota GR Yaris GXPA16 with this very high quality kit, the result of many hours of development and rigorous testing, made in Japan by GReddy! Characteristics : Core size : 141 mm (height) x 625 mm (length) x 100 mm (width) Piping diameter : 50 mm
