GReddy Oil Cooler Kit for Nissan 350Z 313 hp (VQ35HR)

Cena brutto	3 934,41 zł
Cena netto	3 198,71 zł
Numer katalogowy	12024639

Opis produktu

GReddy 16 Row Oil Cooler Kit
For Nissan 350Z (2007-2009)
Engine code: VQ35HR
Ideal for intensive use
Significant reduction in oil temperature
Built-in thermostat (opening between 75 and 82°C)
Comes complete with all accessories required for installation: hoses, bolts, brackets, fittings, etc.
GReddy part number: 12024639
Made in Japan
Express delivery!
GReddy Oil Cooler Kit for Nissan 350Z 313 hp (VQ35HR) Specifications
Specifically designed for the Nissan 350Z 313 hp (VQ35HR engine), this GReddy cooler significantly lowers the engine's oil temperature, especially during heavy use. You are then able to exploit the engine's capabilities for longer while improving its reliability. This cooler keeps the engine oil temperature stable through high heat dissipation and minimal pressure loss. Sporty driving leads to an excessive increase in temperature inside the engine, which harms the oil that lubricates and cools it, resulting in reduced performance and, in the worst case, outright engine failure. Light blue in color, this 16-row GReddy oil cooler mounts in front of the radiator for maximum cooling. It features an internal thermostat (opening between 75 and 82°C) and comes with Earl's braided hoses and GReddy fittings. Caution : This oil cooler was developed primarily for the GReddy 350Z twin-turbo kit, but can also be fitted to naturally-aspirated engines. It is not compatible with the body dampers on the Nismo version.
Kit Contents
Oil cooler core (16 rows)
Braided hoses (1130 mm/1400 mm)
Fittings (straight/straight/90°/180°)
Oil block (Type-E)
Brackets
Other small parts required for installation
