Opis produktu

Protect your engine ! Oil pan baffle plate For Toyota GT86 & Subaru BRZ (engine codes : 4U-GSE, FA20) Made in Japan, high quality finish Reduces movement in the oil pan Limits oil surge Oil pressure is always stable Ideal for intensive use (trackdays, competition...) Material : aluminium with anodized finish Plug & play" installation, without modifications Greddy part no. : 13515904 Greddy Oil Pan Baffle Plate for Toyota GT86 & Subaru BRZ Specifications Designed to be installed in the existing stock pan, this stainless steel baffle plate guarantees better engine protection, reducing oil surge. As it limits oil movement in the lower part of the engine, this plate ensures that a small oil reserve is always available at the oil pump's point of suction. This way, even in intensive use with high centrifugal force, your oil will always be at a stable pressure. This plate can be installed directly into your oil pan without modification. Made in Japan by Greddy, with a high quality finish and perfect fitment.
