GReddy Racing Gear Oil 80W140 GL5 (1L)

Cena brutto	119,88 zł
Cena netto	97,46 zł
Numer katalogowy	17501262

Opis produktu

GReddy Racing Gear Oil 100% synthetic oil Grade 80W140 Ideal for sports driving from street to circuit Excellent low and high temperature protection Longer service life in intensive use Compatible with LSDs GL5 standard Packaging : 1 liter can GReddy part number : 17501262 GReddy Racing Gear Oil 80W140 GL5 Specifications GReddy Racing Oil 80W140 is a very high performance lubricant designed for gearboxes and limited slip differentials. Suitable for both road and competition use, this oil features a 100% synthetic formula blended with esters and PAOs to guarantee excellent lubrication in high-temperature and high-load areas. Thanks to its optimum blend of LSD Booster, it has also been developed to fully demonstrate the performance of LSDs with extreme pressure properties and high durability. Its high viscosity index preserves the gears under all conditions and guarantees constant lubrication and optimum protection. Thanks to its LSD Booster technology, this oil is perfectly compatible with limited slip differentials. Compared with conventional GReddy mineral transmission oil, this fully synthetic lubricant significantly improves low temperature performance and heat resistance. The oil spreads rapidly over gear surfaces in cold weather and its viscosity decreases slowly over high temperature ranges, improving its ability to lubricate and protect metal surfaces in all conditions. In addition, as no additives to improve the viscosity index are used, the viscosity of the oil is less likely to decrease due to shear, and its durability under heavy use is also improved. GReddy Racing Oil 80W140 meets the GL5 standard and is suitable for the following configurations: FF, FR, MR and 4WD gearboxes Limited slip differentials
