Opis produktu

Let your engine breathe !GReddy SPL intake kit for Nissan GT-R R35Engine : VR38DETTImproved filtration and performance !Accessories included, bolt-on fitmentMade in Japan, high quality finishGReddy part no. : 12020907Express shipping !GReddy Suction Kit SPL SpecificationsThe Airinx intake kit replaces the OEM filters and boxes. Thanks to its improved filtration and increased fresh air supply, it reduces intake pressure drop. It improves throttle response and ensures an overall increase in performance while providing an undeniably sporty sound. It is very easy and quick to fit, fully reversible and requires no modifications.This SPL kit is composed of two S80 conical air filters that are placed in the bumper, four large diameter (80 mm) intake tubes and all the associated mounting hardware: brackets, clamps, screws... It is perfectly compatible with the stock turbochargers.Caution: For optimum performance, the installation of this kit must be accompanied by a reset of the engine control unit.
