GReddy Suichūka Shift Knob Specifications
Handmade in Japan, this Suichūka (underwater flowers) shift knob is an original GReddy creation. It takes up the brand's colours with yellow, blue and purple flowers, and incorporates a GReddy acrylic logo and a gloss black base. This elegant knob also provides an excellent grip for fast, precise actions. This universal knob is compatible with most Japanese vehicles thanks to its initial M12xP1.25 thread and its three adapters tapped in M10xP1.5, M10xP1.25 and M8xP1.25. Three sizes are available for this knob: 75x45 mm (weight 157 g), 115x45 mm (239 g), 170x45 mm (346 g). It comes with a sheet of stickers for 5- and 6-speed gearboxes (or GReddy logo). For vehicles fitted with a lever featuring a reverse lock, GReddy offers two optional covers to improve the final appearance of the knob: Type A (internal diameter 29 mm, threaded hole M12xP1.25xT6 mm) and Type B (internal diameter 35 mm, hole Ø12xT4 mm). The Type A cover is suitable for BNR34, JZA80, GDB, VAB, ZN6, ZC6, ZN8, ZD8, GXPA16, etc., while Type B is suitable for ZC33S in particular. These covers can also be used with other knobs.
