 For stock or tuned engines
 Turbo T517Z, T518Z, T620Z or TD06SH to choose from
 Power range from 265 to 450 hp
 High quality build
 Kits designed and made in Japan by GReddy
 GReddy Turbo Kit for Toyota GT86 & Subaru BRZ Specifications
 With a great deal of experience in the turbo field, GReddy offers very high quality kits specially designed to supercharge originally N/A engines. Rather than opting for an expensive N/A build involving the replacement of many internal parts, the choice of a conversion kit like this can prove to be more interesting in terms of performance and budget. Developed for the Toyota GT86 and Subaru BRZ, these "plug and play" products ensure easy assembly and are fully suited to the engine bay of your car. Whether it be a balanced kit for stock engines or a more powerful one to get the most of a tuned set-up, you are guaranteed a significant gain in power and torque over the entire range of use of the 4U-GSE (or FA20) while maintaining excellent reliability. Depending on the turbo kit chosen, additional modifications may be necessary in order to obtain the best results: injectors and fuel pump of higher flow rates, less restrictive exhaust, oil cooler, forged pistons, programmable ECU, boost controller ... Don't hesitate to contact us about your project! Several kits are available for Toyota GT86 and Subaru BRZ depending on the desired performance level:
 T518Z Turbo (actuator) : ~265 hp at 0.5 bar with catalytic converter or ~280 hp without
 T517Z Turbo (actuator) : ~270 hp at 0.5 bar with catalytic converter or ~280 hp at 0.5 bar without
 T620Z Turbo (actuator) : ~330 hp at 0.8 bar with catalytic converter or ~370 hp at 0.9 bar without
 TD06SH-20G Turbo (external wastegate) : up to ~450 hp at 1.6 bar
 Kit Contents : Turbo of your choice
 Stainless steel exhaust manifold
 Stainless steel downpipe
 Type 40E or type 28 intercooler
 Aluminium piping
 GReddy Airin
 x air filter
 Tial external wastegate with its 6 springs (TD06SH kit only)
 Bolts, seals, hoses and other parts required for assembly
