GReddy part no. : 11520098
GReddy Twin Turbo Kit for Nissan 300ZX Z32 Specifications
With its extensive experience in the field of turbocharging, GReddy offers high-quality kits specially designed to boost the performance of standard turbocharged engines. These kits are mainly characterized by turbos larger than the original equipment in order to allow the engine to produce more power and torque. Developed for the Nissan 300ZX Z32 with VG30DETT engine, this kit includes two TD04H-15G 8.5cm² turbos with actuators compatible with the OEM exhaust manifolds and intake pipes. It also includes a stainless steel exhaust outlet tube for connection to the original front pipe. GReddy has designed this kit with reliability and versatility in mind. As a result, this kit can be installed without any problem on a stock or modified vehicle. Depending on your setup, the minimum boost pressure varies between 0.8 and 0.95 bar. In tests carried out by GReddy, the VG30DETT fitted with this kit produced 409 hp at 6990 rpm and 57.3 kgm (562 Nm) at 4800 rpm at 1.2 bar. We can help you with your project, so feel free to contact us!
Kit Contents
