### Opis produktu

GReddy Twin Turbo Kit for Z33  
For Nissan 350Z 313 hp (01/2007-11/2008)  
Engine code : VQ35HR  
Compatible only with RHD models (right-hand drive)  
Ideal for stock or tuned engines  
2 T517Z-8cm<sup>2</sup> turbos at 0.6+ bar  
Power output : 500+ hp  
High quality build  
Kit designed and made in Japan by GReddy  
GReddy Twin Turbo Kit for Nissan 350Z Specifications  
With a great deal of experience in the turbo field, GReddy offers very high quality kits specially designed to provide forced induction to N/A engines. Rather than opting for an expensive N/A build involving the replacement of many internal parts, the choice of a conversion kit like this can prove to be more interesting in terms of performance and budget.  
Developed for the RHD only Nissan 350Z with VQ35HR engine, this kit includes two very versatile T517Z turbos, heavy-duty exhaust manifolds and a twin left-right intercooler for intake balance. It can be installed on a stock engine with the restrictor included (0.6 bar boost or less) but also on an engine reinforced with forged pistons without the restrictor (boost up to 0.8 bar). This kit can be used with a catalytic converter and requires higher flow rates fuel pump and injectors, as well as custom ECU mapping.  
Inspired by the 370Z kit, GReddy has designed this set of parts with reliability and versatility in mind. As a result, this kit can be installed with the same peace of mind on a stock or tuned vehicle. Depending on the parts and the work carried out on the engine, GReddy claims that it is capable of delivering more than 500 hp. We can help you with your project, so feel free to contact us!  
Kit Contents  
Twin T517Z-8cm<sup>2</sup> turbocharger  
Oil pan  
Washer tank  
Exhaust manifolds  
Type 16 twin intercooler  
Aluminum piping  
Airinx S60 air filters  
Bolts, seals, hoses and other parts required for assembly  
Cautions: This kit is designed for Nissan 350Z 313 hp cars produced in Japan from January 2007 to November 2008. It is not compatible with Nismo body dampers.  
Note: Modifications to the engine bay are required. GReddy recommends removing the engine to facilitate the installation of this twin-turbo kit.
