Cena brutto	1 689,00 zł
Cena netto	1 373,17 zł
Numer katalogowy	GT-BF011M-24

Opis produktu

Our philosophy : We wanted to adapt our bucket seats to the evolution of the seating position over time. In the past, with cars not equipped with power steering and longer rallyes. Nowadays, with shorter stages, faster more direct input cars. When strength and stamina was needed, today's key words are speed, accuracy, comfort and adaptability. It was crucial to take into account every of these evolutions for the making of our bucket seats range. A fitting for various tilting options ! PLEASE NOTE: Valid until 31/12/2029! Tested by various body types, the GT2i Race-02 M base was designed for a slightly more tilted driving position for increased comfort and safety in case of a potential crash. The driver is held in place, both at the thighs and shoulders while keeping a great freedom of movements for a quick steering input. Their anatomic design allows for a wide variety of adjustments up to a more upright position for older vehicles thanks to the wide adjustments possibilities offered by our mounting frames (GT-FIX001). Back padding is designed to match the drivers spine and offer perfect comfort. Padding can be either added in the lower back and bottom cushions to refine the driving position. Mesh cloth offers breathability for the backrest. 3 magnets are integrated to retain the harness straps on the sides and base of the seat. Features : Injecte resin shell seat M size seat Approval FIA 8855-1999 Side (center distance 290mm) mounting frames Weight : 9.9kg Lumbar, base adjustments and thigh brackets by padding overlay. Magnet to retain the harness. Honeycomb mesh fabric. Sold with 4 BTR screws + washers for the mounting. Data sheet Supplier Part Number RACE-02M SEAT 2024
