### Opis produktu

The HANS Performance III 30° was developed to create a lightweight and robust FHR system for the best security ever. The tried and tested Sport II served as the basis for this in terms of shape and structure. The completely revised and optimized material structure of the system resulted in a lower weight with consistently high rigidity. This innovative HANS® system restrains the pilot's head during frontal impacts and significantly reduces brain damage and neck injuries. Equipped as standard with a movable holding system for more freedom of movement (sliding tethers). It complies with the standards in force to guarantee a measured resistance to deceleration. Hans with a 30° inclination for single-seater or sport prototype vehicles. Available size : M/L. Weight : 694g Approval : FIA 8858-2010 Data sheet Approval FIA 8858-2010 Inclination 30°
