Opis produktu

The engine mount bracket(T-bracket) is required when performing a B-series engine swap into Civic EG. It features 5mm thick steel alloy construction, offering superior strength and durability to eliminate unwanted vibrations and flex of the mountings under aggressive driving conditions, ensuring the maximum transfer of power to the wheels.. Necessary for B-Swap on EG chassis. High strength steel alloy construction. Reduce engine mounting flex. Provide greater power transfer to the wheels
Note:1 PCS/SET Fits: Honda Civic 5th 1992-1996 EG, EH, EJ1/2
