Opis produktu

The extended bump stops are designed for lifted JB64/74 Jimnys. They limit the up travel of the suspension, preventing shocks absorbers from damages due to over-compression and harsh bottoming. When running large tyres, the extended bump stops also help provide larger clearance to stop the tyres from rubbing on inner arches.. Prevent shocks from bottoming out. Provide larger wheel and inner arches clearance. OEM direct replacement Note:4 PCS/SET Fits:Suzuki Jimny 4th 2018-present
