Opis produktu

The Hardrace sway bar relocation kit is designed for lifted cars. It moves the sway bar mountings downward by 20mm and rearward by 15mm to correct operating angle of sway bar and end links, ensuring optimum handling performance after suspension lifts. The brackets are made of CNC machined aluminum with an anodized finish, built tough to withstand extreme off-road driving conditions. The kit includes 2 sizes of sway bar bushings, suitable for both stock 28mm bars and 30mm Hardrace bars.. Correct sway bar operating angle. Restore handling performance on lifted cars. 2-way adjustable (Downward / Downward+Rearward). Anodized CNC aluminum construction. Factory front bumper compatible. Suitable for OE 28mm & Hardrace 30mm sway bar Note:For 3" LiftFor OE Sway Bar & #Q0578 Use8 PCS/SET Fits:Suzuki Jimny 4th 2018-present
