Hardrace Kseries Swap Engine Mount Kit Honda Civic Integra

Cena brutto	2 694,32 zł
Cena netto	2 190,50 zł
Numer katalogowy	HR-Q0751

Opis produktu

The engine mount kit is required when performing a K-series engine swap into Civic EG/Integra DB6~DC2. It features 5mm thick steel alloy construction for the brackets, offering superior strength and durability to withstand higher horsepower and torque output. With the reinforced solid rubber bushings, this kit also capably eliminate unwanted vibrations and flex of the mountings under hard acceleration, braking and cornering, ensuring the maximum transfer of power to the wheels.. Required for K-Swap on EG/DB6~DC2 chassis. High strength steel alloy brackets. CNC aluminum alloy mounts. Reinforced solid rubber bushings equipped. Reduce engine movement under aggressive driving conditions. Provide greater power transfer to the wheels Note:5 PCS/SET Fits:Honda Civic 5th 1992-1996 EG, EH, EJ1/2 Honda Integra DC2 1994-2001 Honda Integra DC2 Type R 1995-1998
