Hardrace Kseries Swap Engine Mount Kit Honda Civic

Cena brutto	2 694,32 zł
Cena netto	2 190,50 zł
Numer katalogowy	HR-Q0752

Opis produktu

The engine mount kit is required when performing a K-series engine swap into Civic EK. It features 5mm thick steel alloy construction for the brackets, offering superior strength and durability to withstand higher horsepower and torque output. With the reinforced solid rubber bushings, this kit also capably eliminate unwanted vibrations and flex of the mountings under hard acceleration, braking and cornering, ensuring the maximum transfer of power to the wheels.. Required for K-Swap on EK chassis. High strength steel alloy brackets. CNC aluminum alloy mounts. Reinforced solid rubber bushings equipped. Reduce engine movement under aggressive driving conditions. Provide greater power transfer to the wheels Note:" Civic '92-96 or Integra '94-01 subframe swap required6 PCS/SET Fits: Honda Civic 6th 1996-2000 EK3/4/5/9, EJ6/7/8/9, EM1
