Hardrace Rc Tie Rod End For For

Cena brutto	921,27 zł
Cena netto	749,00 zł
Numer katalogowy	HR-Q0438

Opis produktu

Steering tie rod angle changes as the suspension is lowered. This will make the car difficult to control due to the unwanted toe change during suspension travel (Bumpsteer). Hardrace RC tie rod ends, by relocating the tie rod end ball joint pivot, will help return the geometry back to original specs for proper steering response. The tie rod ends are manufactured from high quality pillow ball joint to provide a more direct and responsive steering feel and sustain extensive loads. Its adjustable design allows the rod height to be adjusted by spacers to accommodate different ride heights.. Correct steering geometry on lowered cars . Provide more direct steering response. Premium quality pillow ball joint equipped. Adjustable design to suit different ride heights. Direct bolt-on with OEM components Note:2 PCS/SET Fits:Honda Civic 5th 1992-1996 EG, EH, EJ1/2 Honda Civic 6th 1996-2000 EK3/4/5/9, EJ6/7/8/9, EM1 Honda Del sol EG1/2 1992-1998 Honda Integra DC2 1994-2001 Honda Integra DC2 Type R 1995-1998
