Hardrace Rc Tie Rod End For For Subaru BRZ

Cena brutto	921,27 zł
Cena netto	749,00 zł
Numer katalogowy	HR-Q1046

Opis produktu

Steering tie rod angle changes as the suspension is lowered/lifted. This will make the car difficult to control due to the unwanted toe change during suspension travel (Bumpsteer). Hardrace RC tie rod ends, by relocating the tie rod end ball joint pivot point, will help return the geometry back to original specs for proper steering response. The tie rod ends are manufactured from high quality pillow ball joint to provide a more direct and responsive steering feel and sustain extensive loads. Its adjustable design allows the rod height to be fine adjusted by spacers to accommodate different ride heights.. Correct steering geometry on lowered & lifted cars. Provide more direct steering response. Premium quality pillow ball joint equipped. Adjustable design to suit different ride heights. Direct bolt-on with OEM components Note:For Lift & Lowering UsePillow Ball Equipped2 PCS/SET Fits:Subaru BRZ ZD8 2021-PRESENT
