Hardrace Rear Camber toe Adjusting Spacer Ford Focus

Cena brutto	1 023,45 zł
Cena netto	832,07 zł
Numer katalogowy	HR-Q0542

Opis produktu

The OE rear torsion beam of FOCUS MK4 does not allow for any alignment changes. HARDRACE rear adjusting spacer can help you to reduce the rear toe degree easily. By replacing the factory caliper mounting bracket and install the rear adjusting spacer, it will correct the toe-in to normal of lowered car.. Constructed of high-strength steel alloys. Improve stability . Smooth and accurate feel when breaking. Increase steering response . Less understeer Note:2 PCS/SETTOE IN FROM 0.2° TO 0.1°ADD NEGATIVE CAMBER BY 1°* For torsion beam rear axle Fits:Ford Focus MK4 2018-
