Opis produktu

Rear diff mount support bar constructed of high-strength steel alloys that offer durability, strength and yet remain light-weight. By bolting it onto the back side of the rear sub-frame, the brace will support the rear differential and eliminates the movement of the rear differential. It will allow more energy to be transferred to the wheels under acceleration.. Quick and easy install on OEM bolt holes. Made with high quality ultra strong steel. ED process and painting for the highest durability. Equipped with premium quality bushings.
