Opis produktu

When you lift your Jimny equipped with LED headlights, the factory headlight sensors do not compensate for the change in suspension geometry effectively, and will result in the headlights pointing upwards. Hardrace adjustable headlight leveling rod will help fix the angle of sensor linkage by extending the connecting rod and mounting points to get the headlight beam adjusted to correct direction.. Correct headlight leveling sensor geometry on lifted cars. Premium quality connecting rod joints equipped Note:Adjustable - For 2"+ Lift1PCS/SET Fits:Suzuki Jimny 4th 2018-present
