Opis produktu

Steering drag links and panhard rods will operate at severe angle and affects driving stability when running large suspension lifts. Hardrace reverse/inverted tie rod end + panhard rod extension bracket, with flipped drag link rod end and higher axle side panhard rod mount, they help flatten both suspension and steering system operating angle to restore factory geometry without creating bump steer. The tie rod end and extension bracket feature premium quality pillow ball joints and ED coated high strength steel construction to sustain extensive loads and offer a more direct steering feel over the factory components.. Fix suspension and steering geometry on lifted cars. Premium quality pillow ball joint equipped for direct steering response. High strength steel construction to sustain extensive loads. Direct bolt-on with OEM components, No drilling required. Note:* For LHD Car Use* For 3"+ Lift* 16-inch or larger rims required1 PCS/SET Fits:Suzuki Jimny 4th 2018-present
