Opis produktu

Hardrace is proud to present the steering drag link for Jeep JL/JTs. The drag link is constructed of high strength carbon steel tube and greasable ball joints to offer superior strength, durability, serviceability and solid steering feel for extreme off-road usage. The adjustable drag link is designed to fit all models with different axle width and also correct steering geometry that has been altered with suspension lifts. The knuckle side ball joint can be installed inverted/flipped, which helps eliminate bump steer appears on track bar mount raised cars(requires knuckle drilling to fit the flip adapter).. High strength steel construction. Greasable ball joints with zerk fittings. Correct steering geometry on lifted cars Note:For LHD models1PCS/SET Fits:Jeep Wrangler JL 2018-present Jeep Gladiator JT 2019-present
