Hemi Plate System (50-400Hp) with 12Lb Composite Bottle Nitrous Express NX 20944-12

Cena brutto	9 080,00 zł
Cena netto	7 382,11 zł
Dostępność	Na zamówienie
Numer katalogowy	331545955
Kod producenta	USA-NX-20944-12

Opis produktu

Hemi Plate System (50-400Hp) with 12Lb Composite Bottle The Nitrous Express HEMI Plate System includes a billet aluminum nitrous plate that fits between the throttle body and intake manifold making installation quick, easy, and attractive. This system includes 12lb composite bottle, Pro Power Lightning series billet aluminum and carbon fiber solenoids, 24in S.H.O. braided stainless lines from solenoid to plate, master arming switch, TPS activated WOT module (for use with fly by wire throttle bodies), as well as every nut, bolt and electrical connector needed to complete the installation. This system includes jetting for 50, 100, 150, 200, 250, 300, 350, and 400hp. This system is configured as a single stage system by default with 50-400hp jetting. The plate is pre-machined with a second set of nitrous and fuel passages so you can easily upgrade the system to a dual stage system capable of flowing 800hp!!! Add pn NX944D to this system to make it a dual stage system. This system includes the latest technology and the best components available. NX Lightning solenoids feature an improved flow path that eliminates sharp turns and expansion areas in the nitrous flow path. This keeps the nitrous in dense liquid form which makes more power on less nitrous. Lightning nitrous solenoids feature an integrated purge port which allows you to connect a purge valve directly to the body of the nitrous solenoid for clean looks and less plumbing. Lightning Series solenoids feature CNC aluminum bodies topped with Carbon Fiber cans for the ultimate in weight savings. THE NITRO BOTTLE IS EMPTY! Instructions PDF
