Dostępność	Na zamówienie
Numer katalogowy	379176170

Opis produktu

Designed as a direct replacement for the OEM plastic discharge pipe (**Part No. 5Q0145840**) used on 1.8T and 2.0T engines found in various VW, Audi, Seat and Skoda models.

Full mandrel bent single piece hard pipe with larger bore size for **increased flow**. This ensures high amounts of air are discharged from the turbo charger and therefore **releasing the full potential of your engines capabilities**. Unlike the OEM discharge pipe that is prone to failure from increased boost or many heat cycles, the Forge Motorsport high flow discharge pipe will not crack or fail - ever. **This is backed up by our no quibble Lifetime warranty.**

Supplied in black powder coated finish for that OEM look with a choice of hose colours red, blue, or black to **compliment the look of your engine bay**. No modifications to original equipment are necessary to install this part. This will fit with the stock turbo muffler or with the Forge Motorsport Muffler Delete [FMMD2](#) which will further enhance the benefits of this discharge pipe.

**In the box:
Hard pipe
Silicone Hose
Hose Clamps**

***NOT COMPATIBLE WITH 7-SPEED DSG MODELS**
