HPFP CatCams zestaw wałka z Cam Lobe RTMG Performance dla 2.0 TFSI EA113 Czerwony

Cena brutto	1 402,76 zł
Cena netto	1 140,46 zł
Cena poprzednia	1 731,22 zł
Dostępność	Na zamówienie
Numer katalogowy	331469123
Kod producenta	RTMG-901-0321

Opis produktu

This Kit includes all parts needed for converting the cam follower type High-Pressure Fuel Pump to a roller follower kit just like the newer EA888 TSI engines. It is common for the 2.0 TFSI EA113 engine to have excessive wear in the cam follower which touches the camshaft lobe.

If the cam follower wears all the way through, excessive damage can be caused to the engine and intake camshaft. This conversion protects against this problem, and ensures the reliability and smooth operation of your high-pressure fuel pump, without the need of replacing the cam follower again.

In addition, the fuel pump flow capability is improved by increasing the effective stroke by 28% (or 18.5% in CDL engines).

Warning: The installation of this kit requires machining of the high-pressure fuel pump cover to fit the roller kit conversion. In addition, removal of the cam lobe that drives the pump and pressing the new lobe in the same orientation is required.

*** This product is designed only for CatCams camshafts.**
