Hyundai i20N & Elantra N Line Atmospheric and Recirculating Dump Valve

Cena brutto	1 246,62 zł
Cena netto	1 246,62 zł
Dostępność	Na zamówienie
Numer katalogowy	379177212

Opis produktu

This part replaces OEM Part No. 28234-2S300

Highlights:

- Utilising world leading springs for more precise operation and consistency
- All internal and external components have been made in the UK, ensuring top quality, and offering a valve with faster response times and longer service intervals
- The piston uses heat stabilised Viton O-rings
- Lubricated with high temperature [Mobil1](#) grease to ensure a long life with minimal wear and very long service intervals
- A super durable and responsive aluminium piston
- Fully [serviceable](#) and rebuildable in minutes
- Available in anodised Black OR Red
- Unlike other valves on the market, ours produces no check engine lights (EML)
- Covered by the unique Forge Lifetime Warranty*

Our uprated valve for the Hyundai i20N and the Elantra N Line has been expertly manufactured and designed in the UK, meaning we can provide the industry leading valve for your vehicle. Specifically designed for the Hyundai, this valve can be used either as a [fully atmospheric \(blow off\) valve](#), or a recirculating valve - you choose!

Our unrivalled design uses a boost to side entry on the valve meaning unlike our competitors the valve cannot lift under high or low boost applications. The advantage of this eliminates the need to change the valves internal spring rate to a higher tension when tuning the vehicle. This valve is finished in **anodised black or anodised red** to not only give this product the wow factor out of the box, but also to improve the aesthetics of the engine bay of your vehicle.

We recommend [servicing](#) your valve every 3 years, or 20,000 miles, whichever comes sooner
